Save now, pay as you go.

Milestone's Clean Chemistry tools start paying for themselves in terms of reduced labor and lower reagent costs the moment you begin using them. And now you can start realizing those savings without a high initial investment.

Financing through our no interest or sub-prime rates can improve your lab's flexibility by allowing it to preserve its capital for other uses, such as investments or growth opportunities.

This special offer allows you to benefit from optimizing your lab's sample prep workflow sooner rather than later. But it is available for a limited time, so don't delay.

Acid Purification

Realize up to 90% cost savings of ultra-pure acids by purifying low-cost reagent grade acids.

Automated Reagent Dosing

Automate the manual addition of reagents, reducing the operator time to just a few seconds, improving workflow and lab safety.

Acid Steam Cleaning

The most efficient and effective cleaning of your sample prep vessels for trace metals analysis is safe and easy to use, eliminating operator exposure to acid baths and vapors.

*purchase price based off budgetary quote. Subject to credit approval. Offer valid through 9/30/2023.
